Golden Visa Holder | RTA Driving License & Vehicle Holder

PROFESSIONAL SUMMARY

Cybersecurity graduate from RIT Dubai and CEH v13-certified, with hands-on Security Engineering experience in SIEM/EDR administration, log analysis, threat monitoring, and network security. Experienced with Elastic, RaptorX XDR/SIEM, Wazuh, and FortiSIEM. Currently seeking opportunities in SOC, Security Engineering, or Blue Team roles where I can apply my practical security experience and continue developing professionally.

EDUCATION

Rochester Institute of Technology, Dubai, UAE

Bachelor of Science, Computing Security

2022 – 2026

Related Coursework: Penetration Testing, Malware Reverse Engineering, Network Security & Forensics, ML & Cyber Analytics, Risk Management

GPA: 3.40/4.00 | Dean's List (4x)

RELEVANT EXPERIENCE

Maguire, Dubai, UAE - **Security Engineer Intern (Co-op)**

June 2025 – July 2026

- Improved security event visibility across 56 data sources by building production ELK Stack ingest pipelines.
- Reduced alert triage time by developing Logstash parsing and transformation logic for structured telemetry.
- Wrote ES|QL and KQL queries to search client logs for high-priority events and errors, building Kibana dashboards for detection.
- Supported 36 client environments by administering the RaptorX XDR/SIEM platform and maintaining reliable security monitoring.
- Automated security data parsing and transformation using Ruby scripting and Elasticsearch ingest pipelines to improve log processing efficiency.

ALEC, Dubai, UAE - **Network Security Analyst Intern**

Jul 2023 – Aug 2023

- Hardened the network perimeter by configuring and managing firewall policies, reviewing and tuning firewall rules to strengthen security controls.
- Identified and validated threats and vulnerabilities through continuous monitoring of live systems and analysis of network traffic.
- Accelerated incident resolution by investigating security alerts and correlating logs across multiple systems.
- Utilized Fortinet solutions, including FortiGate and FortiSIEM, to support network security operations and threat monitoring.

KEY PROJECTS

- SOC Home Lab: EDR Monitoring, Threat Detection & Automated Response – LimaCharlie EDR lab with Sysmon telemetry, C2 simulation, and automated D&R rules for credential dumping/ransomware detection.
- Active Directory Kerberos Exploitation Detection with Wazuh – deployed Wazuh EDR with custom rules to detect CVE-2022-33679 Kerberos attack activity.
- IoT Intrusion Detection with Hybrid ML Ensembles – trained TabNet and Isolation Forest/OCSVM + LightGBM ensembles, achieving 97%+ binary detection accuracy.
- AI-Powered Faculty Information Management System (Capstone) – RAG system with fine-tuned LLaMA 3.1-8B/Mistral 7B, SSO/SAML auth, and RBAC.

SKILLS & CERTIFICATIONS

Skills: SIEM & Detection: Elastic Stack (Elasticsearch, Logstash, Kibana, ES|QL), Wazuh, Splunk, XDR, MITRE ATT&CK, Painless, Python

Security Ops & Network: SOC monitoring, incident response, log analysis, threat hunting, firewalls (Fortinet), IDS/IPS, TCP/IP, NIST 800-30

Certifications: CCNA | CEH v13 | Google Cybersecurity Professional | Fortinet NSE Associate
